Recently, EPA and the USACE met with the Missouri Attorney General and officials from St. Louis Airport as well as the city of St. Louis to discuss how work at the West Lake landfill Superfund site may affect airport operations. As the airport is located close to several other municipalities, we wanted to share the attached letters to ensure that the nearby municipalities are aware of the discussion regarding airport flight operations safety as it relates to work at the site.

Please let me know if you have any questions.

Thanks,

Benjamin M. Washburn
